1. You want to go to Ireland for two months in order to study English. In groups, think about some of the arrangements you need to make in advance.

2. Within your new group, discuss on the things you need to plan and agree about the arrangements you should do before travelling abroad.

3. Using the Internet, try to plan your stay in Ireland (means of transport, medical insurances, accommodation, language courses, grants...). You can use these websites to get started:

Don't forget to take notes because in the next session you will have to talk about your plans to your classmates.

4. Share your arrangements with the whole class and discuss on how planning could be improved.
